

SEARCH ENGINE OPTIMIZATION

NT208 – Web programming

WHAT IS SEO?

Search engine optimization (SEO) – is the process of affecting the visibility of a website or a web page in a search engine's unpaid results - often referred to as "natural", "organic", or "earned" results

WIKIPEDIA

THE ANATOMY OF A SERP (SEARCH ENGINE RESULTS PAGE)

Keyword / Search Query

Paid Product Listings

Paid Search Results

Organic Search Results

The screenshot shows a Google search for "Star Wars: The Last Jedi". The search bar at the top is highlighted with a green box. Below the search bar, navigation tabs for "All", "News", "Videos", "Images", "Shopping", "More", "Settings", and "Tools" are visible. The search results are categorized into several sections:

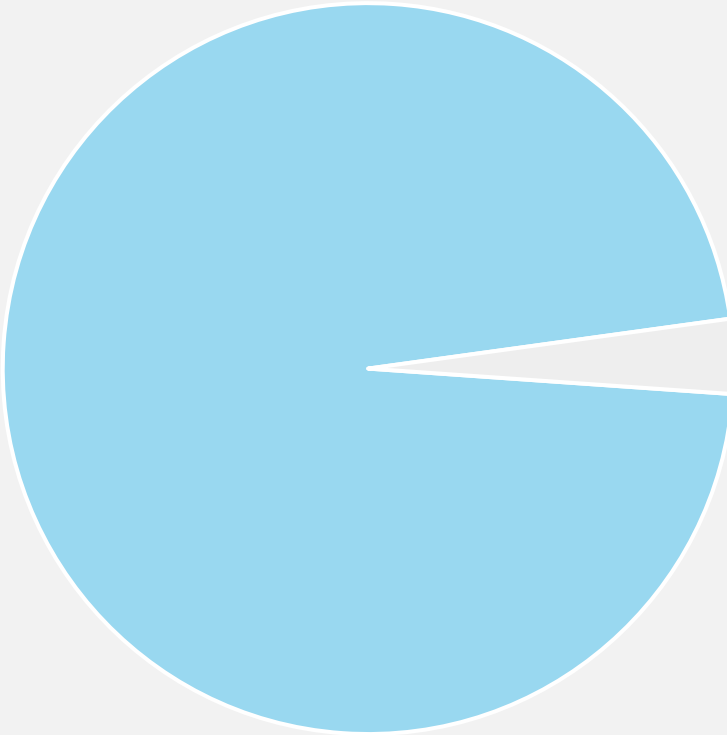

- Sponsored:** A section titled "Shop for star wars last jedi on Google" containing four product listings for "Star Wars: The Last Jedi" (Blu-ray + Digital) from Target, Walmart, Best Buy, and Best Buy. This section is highlighted with an orange box.
- Star Wars: The Last Jedi:** A section showing the movie's details, including its release year (2017), genre (Fantasy/Science fiction), runtime (2h 32m), and ratings (7.4/10 IMDb, 85% Metacritic, 90% Rotten Tomatoes). This section is highlighted with a purple box.
- Top stories:** A section featuring three news stories related to the movie, including "Star Wars: Frank Oz Explains How Yoda Wound Up in The Last Jedi", "All the Things the Star Wars: The Last Jedi Novelization Adds to the Movie", and "The Morning Watch: LEGO Star Wars The Last Jedi, Felicity and the Mystery of JJ...". This section is highlighted with a blue box.
- Star Wars: The Last Jedi - Wikipedia:** A section providing a brief overview of the movie, its production company (Lucasfilm Ltd.), and its director (Rian Johnson). This section is highlighted with a green box.
- Star Wars: Episode VIII - The Last Jedi (2017) - IMDb:** A section showing the movie's IMDb page, including its rating (7.4/10) and a brief synopsis. This section is highlighted with a blue box.

On the right side of the page, there is a large image of the movie's cover and a video player for the "OFFICIAL TRAILER".

SEARCH USERS PREFER ORGANIC LISTINGS

ORGANIC IS THE MARKET-WIDE VOICE OF THE CUSTOMER

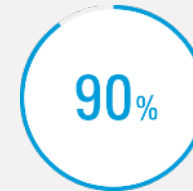

Telling you what customers want in the moments that matter

Buyers turn to organic
at research stage

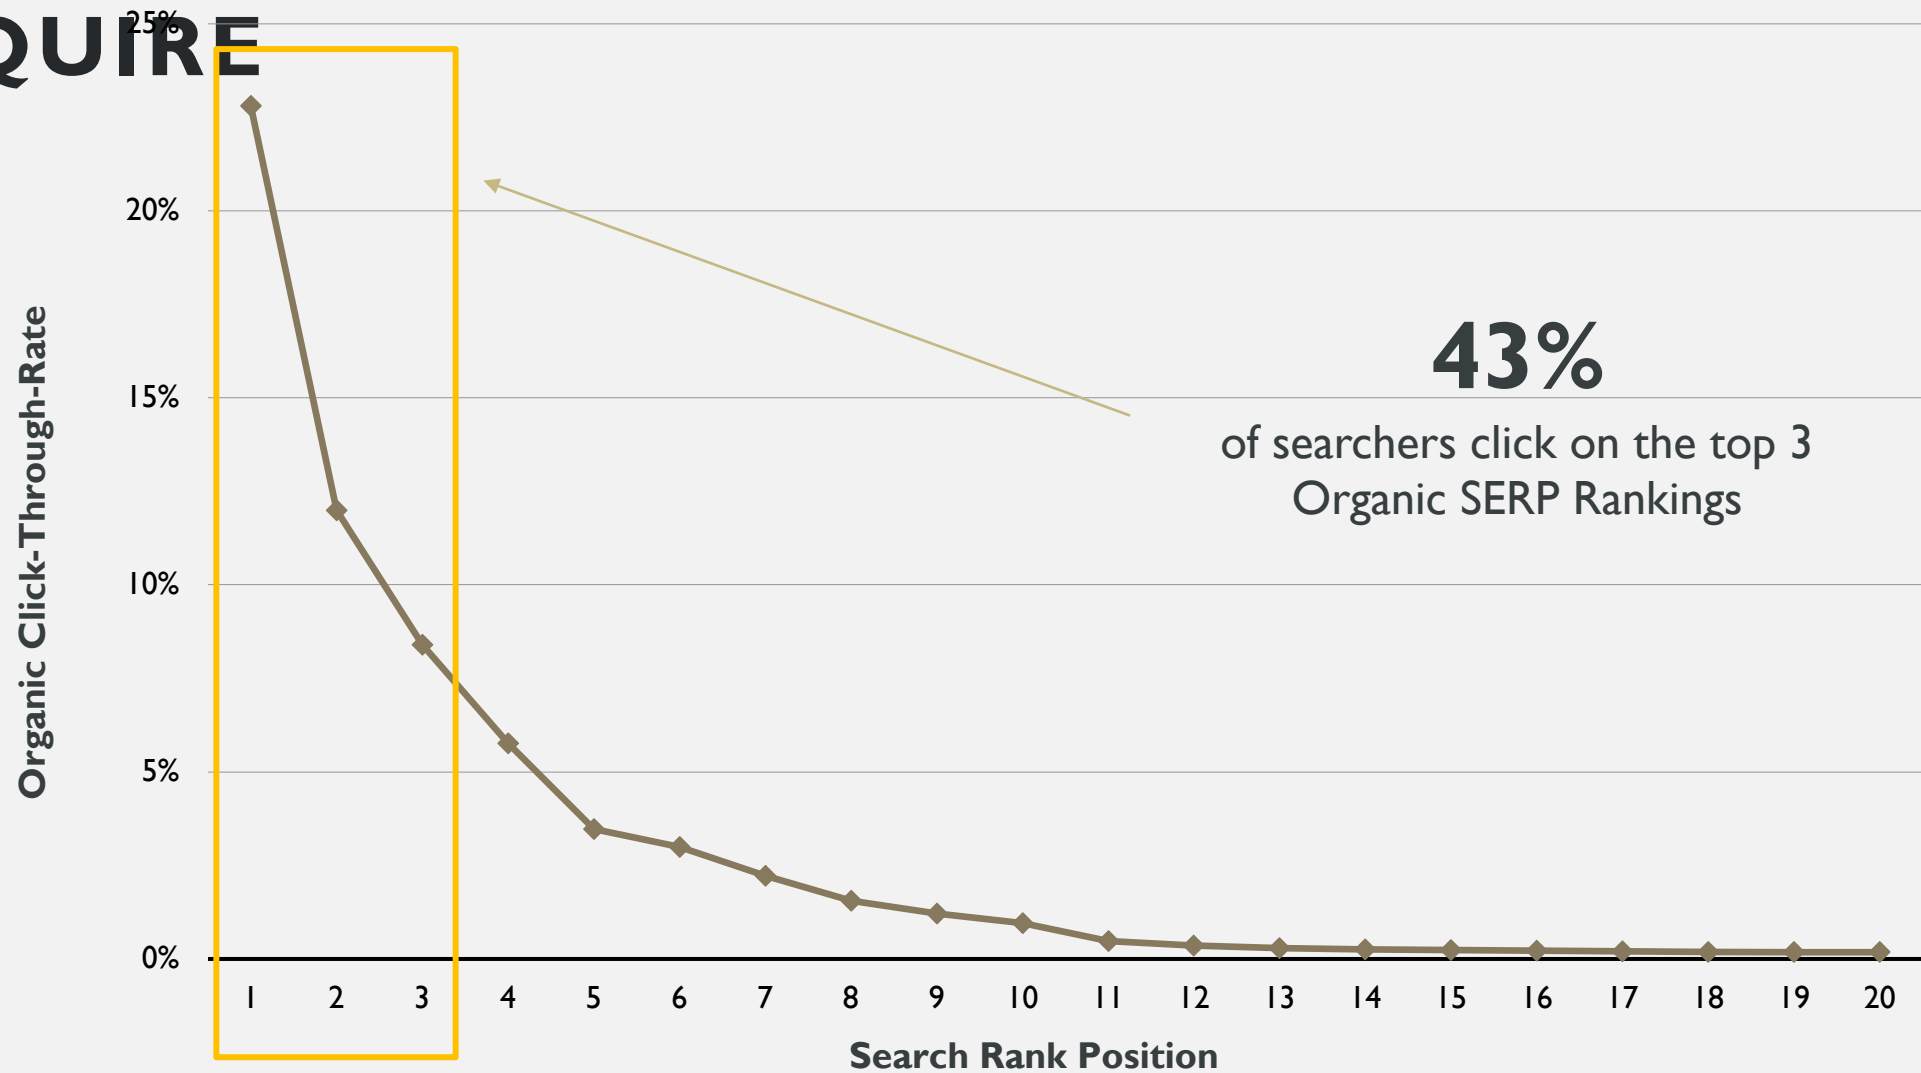

Consumers use search engines
for purchase decisions

Smartphone users look for
information, not brands

THE HIGHER YOUR WEB LISTING RANKS, THE MORE ORGANIC TRAFFIC IT CAN ACQUIRE

HOW DO SEARCH ENGINES WORK?

Step 1:

Crawl Links and Web Sites

Search engine bots crawl through the World Wide Web to find new websites based on the text on the website or links to websites

Step 2:

Index and Cache Web Pages

As bots find pages on the web, they decide whether or not they want to include that web page within their index based on their own set of criteria

Step 3:

Apply Ranking Algorithm

Once a search engine has built up its index, it will rank the pages according to the relevancy to the search keyword and serve up the best results on SERP

GOOGLE ALGORITHM CHANGES MANY TIMES

100% SECURE SEARCH

2013

In an effort to protect internet users privacy Google removed traffic data insights on a keyword level

PANDA AND PENGUIN UPDATES

2015

Poor quality content, duplicate content and bad backlink profiles penalized websites in the SERPs

HUMMINGBIRD REMODEL

2017

Google algorithm includes “meaning technology” to better understand user intent; better content = better rankings

GOOGLE CAROUSEL AND RANK BRAIN

2017

How to Create an SEO Strategy for Mod

“XYZ”, Just what I was looking for

An SEO strategy that creates content that answers the user's need.

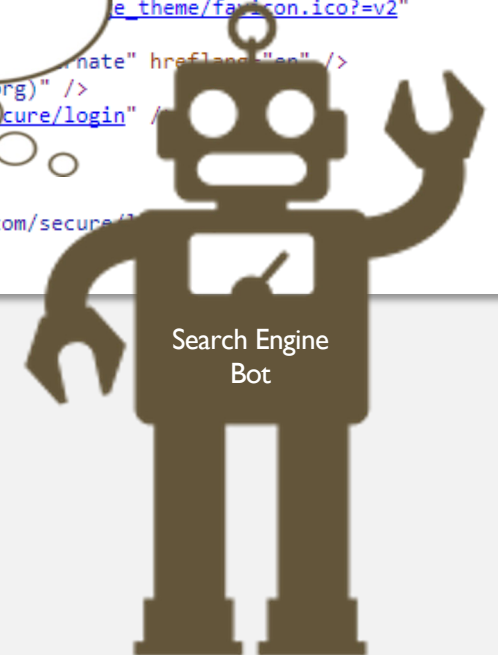

Consider that 81% of customers and 87% of B2B buyers report using the internet when investigating a potential purchase, brands clearly understand the value of a strong online presence. Your SEO strategy should make up the cornerstone of this online presence. With 51% of the traffic arriving on your website coming from organic clicks, and a significant portion of the traffic going to sites in the top 3 spaces, the position and visibility of your site on the internet has a dramatic impact on your ability to draw in new customers.

CODE - ON-PAGE OPTIMIZATION: TITLE TAGS

Why is it important?

Title is the **most important** on-page ranking factor and is the main text that describes an online document.

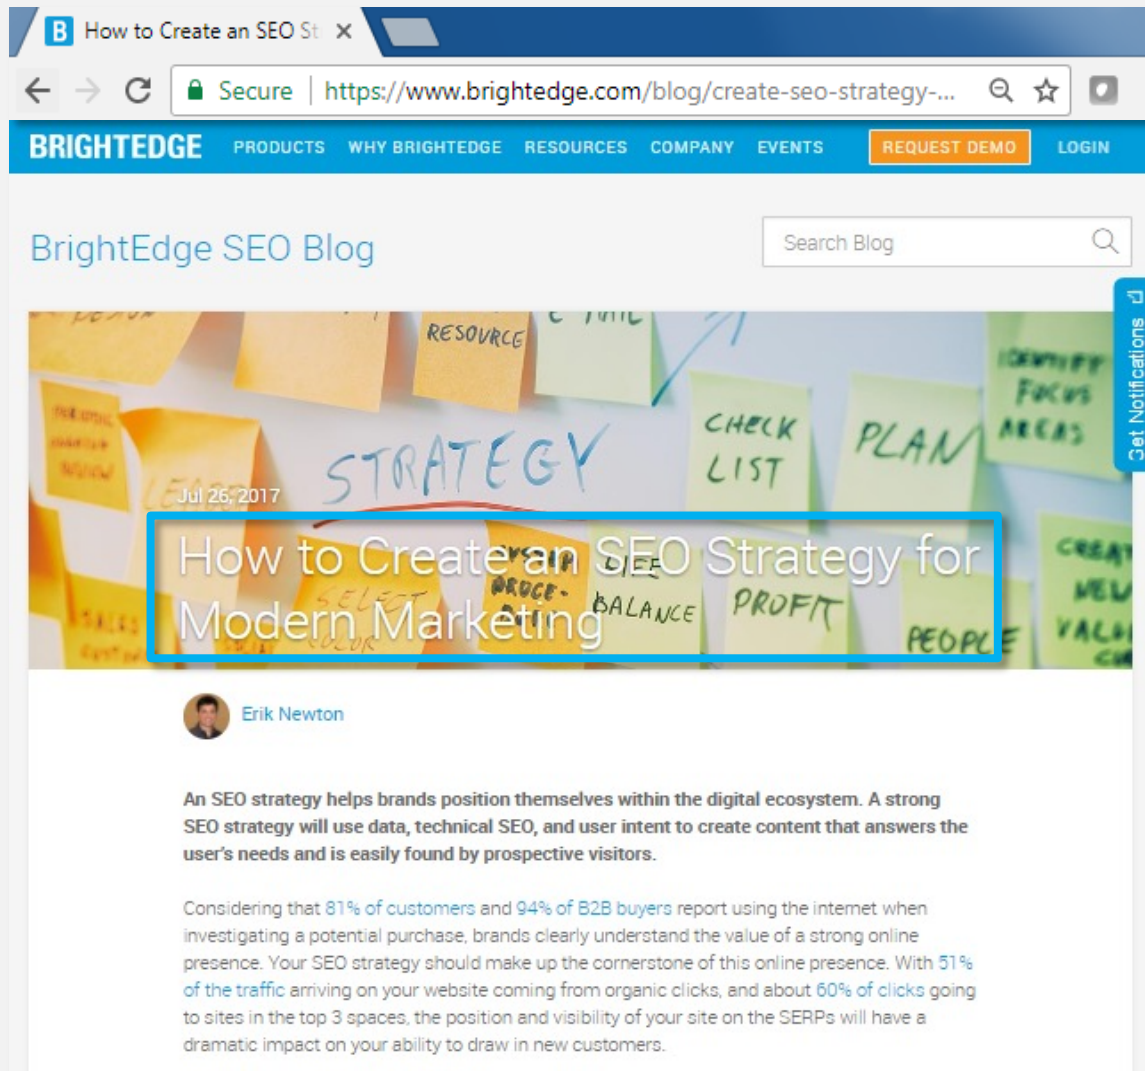

What it looks like in the source code:

```
<title>How to Create an SEO Strategy for Modern Marketing</title>
```

Recommendation

- Use rich keyword phrases that best describe the web page
- Make them unique for each page and use a strong CTA (Call to Action) based on buyer intent
- Try to keep them around 55-65 characters long

CODE - ON-PAGE OPTIMIZATION: HEADER TAGS

What is it?

On-page HTML tags are located within the body copy that identify the most important text on the page. The H1 is the headline of the page. There are 6 header tags, ranging from H1 (the most important) to H6 (least important).

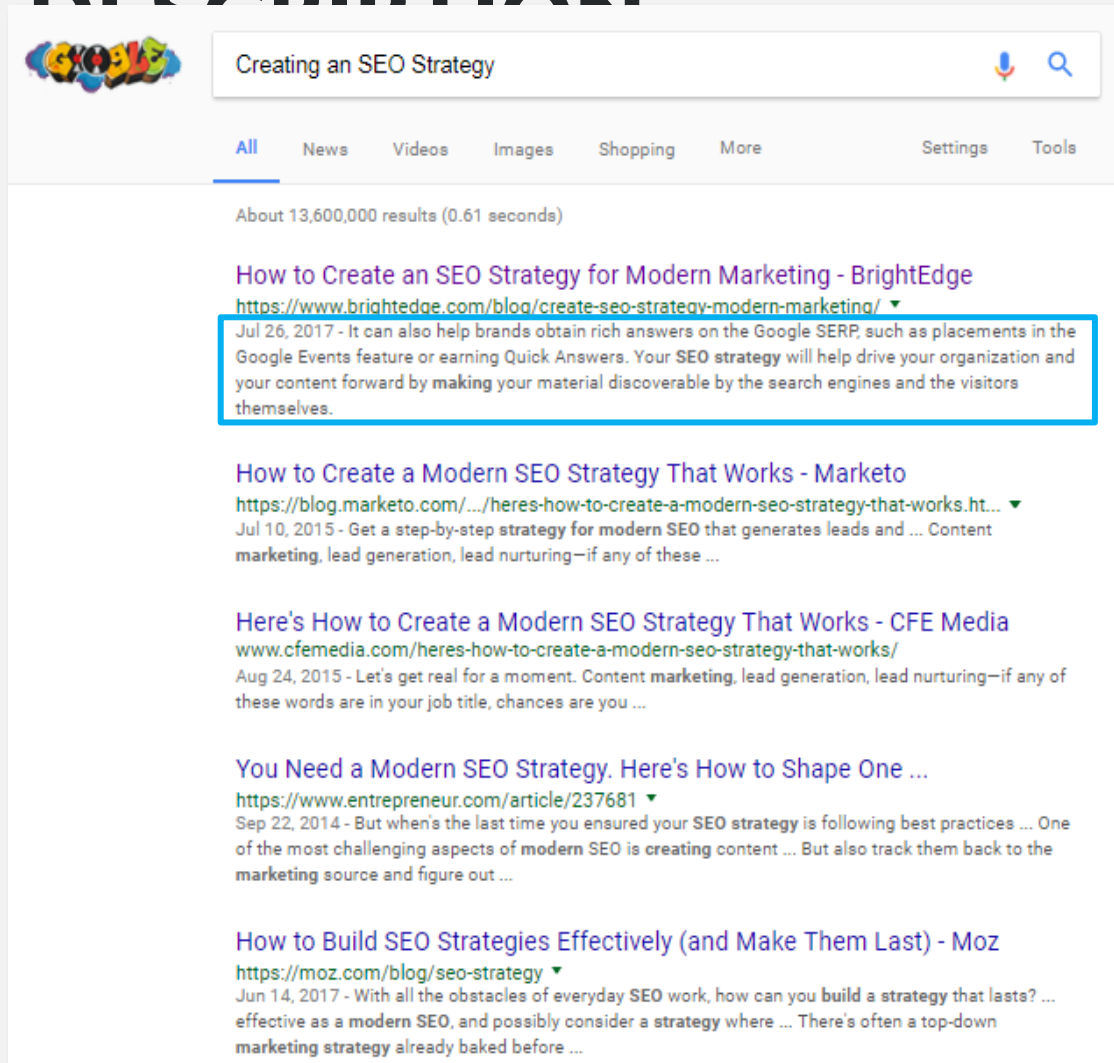

What it looks like in the source code:

```
<h1 class="entry-title">How to Create an SEO Strategy for Modern Marketing</h1>
```

Recommendation

- Use H1 only once per page
- Make sure the H1 is keyword rich and unique
- You can use H2 and H3 tags multiple times, but keep them unique from page to page
- Keep header tags in order

CODE - ON-PAGE OPTIMIZATION: META DESCRIPTION

What is it?

A description of what your web page is about. It will also show up as the page summary on the SERP.

Why is it important?

An engaging and descriptive meta description will attract more clicks when your pages shows up in search results. Think of it as a mini ad.

Recommendation

- Include strong call-to-actions
- Make sure keyword is included early in the first line
- Make them unique for each page
- Try to keep them around 120-150 characters long

CONTENT - CREATING ENGAGING CONTENT

1. Prioritize profitable topics – Identify the 1-3 keywords or keyword phrases that relate to your topic
2. Tune content to your audience – Balance informative content for the human reader with keyword placement
3. Keep readers clicking – Ensure you have interlinking from your content to other related topics within your site
4. Keep published content optimized – Track content performance and optimize accordingly

CONTENT - KEY THINGS TO INCLUDE WHEN BUILDING NEW CONTENT

Helpful web content brief
template when creating
each piece of content

What is the page about?

One sentence summary

Keyword phrases

What is the goal of the page?

Business goal

How is the goal to be measured?

KPI

Who is going to visit it?

User group/Target audience/Persona

Why will they visit?

What helps fulfill the user's goal?

Page responsible

A person not a function

Go!

No
Go!

CONTENT - KEYWORD RESEARCH FACTORS

RELEVANCE

- Is your content and website addressing a need for this keyword?
- Would a customer expect to land on your site after searching for this keyword?

SEARCH VOLUME

- High search volume indicates higher potential visits, but may also indicate higher ambiguity (for example “holidays” vs “luxury holidays in Maldives”)

USER INTENT

- Is the customer looking to purchase, learn, or be entertained?

Competition (Difficulty to rank higher)

- Long tail terms offer lower search volume, but higher relevance; head terms offer higher potential visits, but lower relevance
- Head terms: High competition
- Long tail: Low competition

CONTENT - INTERNAL LINKS

Keyword Reporting

Keyword: Search

Report Type: Date Range:

Total Ranked Keywords

Keyword	Rank	Score
keyword 1	1	100
keyword 2	2	90
keyword 3	3	80
keyword 4	4	70
keyword 5	5	60
keyword 6	6	50
keyword 7	7	40
keyword 8	8	30
keyword 9	9	20
keyword 10	10	10

Time Range: Aug 15, 2017 to Aug 20, 2017

Monthly Search Volume: 11,000 Avg. Keyword Rank: 10.00 Standard Deviation: 1.00 Standard Deviation on Page: 1.00 Standard Deviation on Page: 1.00

What is it?

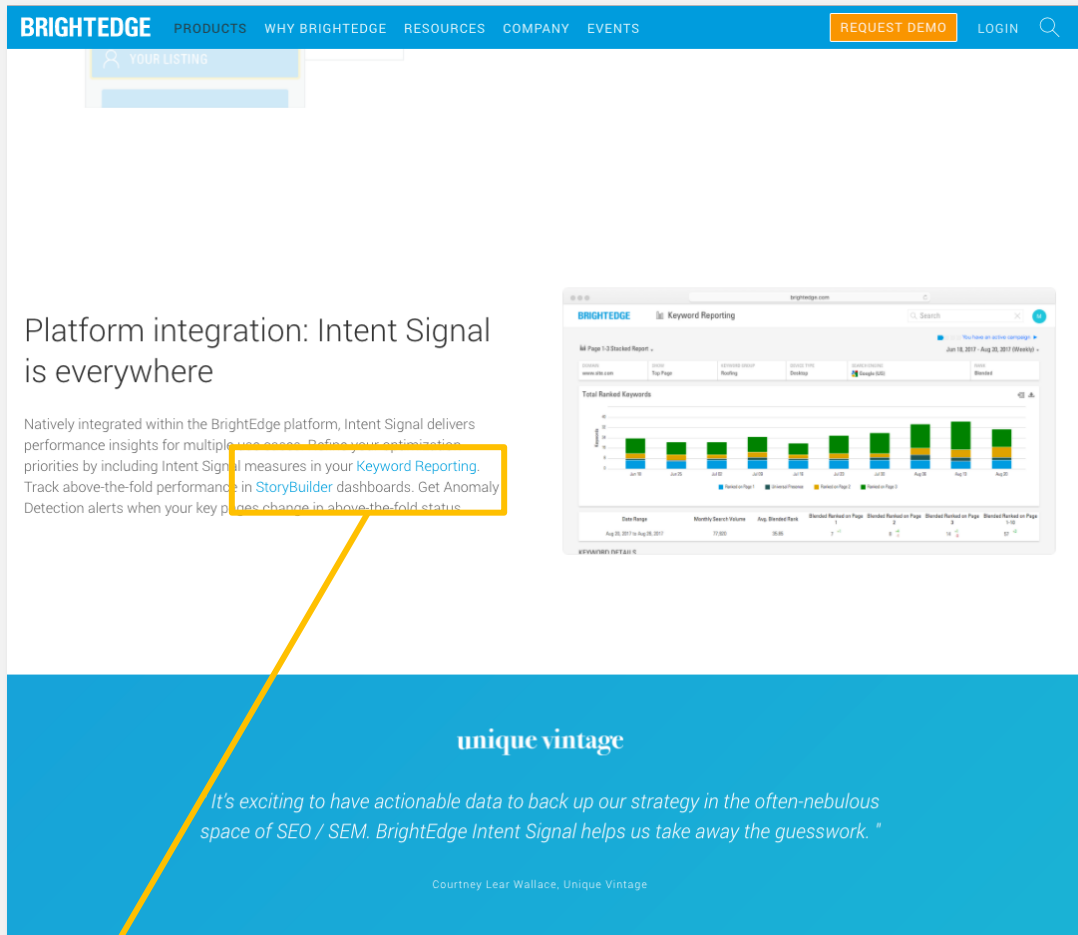

Internal links are links that go from one page on a domain to a different page on the same domain. They are commonly used in main navigation within a site.

Internal links are often useful for several reasons:

- To allow users navigate a website
- To help establish information hierarchy for the given website
- To help spread link equity across a website
- To use as a "soft conversion" CTA for top-of-the-funnel content

```
<a href="https://www.brightedge.com/products/s3/keyword-reporting">Keyword Reporting</a>
```

CONTENT - ANCHOR TEXT

What is it?

Anchor text is the visible text on a page that can be clicked on and links to another page. In the example to the left, the login page has is an internal link to another section on the BrightEdge site. The anchor text that can be seen, “Content Performance”.

What it looks like:

The anchor text comes after the link in the source code.

```
<a href="https://www.brightedge.com/products/s3/keyword-reporting">Keyword Reporting</a>
```

```
<a href="https://www.brightedge.com/products/s3/keyword-reporting">Keyword Reporting</a>

TAG

Google: H1 Tags Are Not Critical For Search Ranking

Oct 1, 2019 • 7:42 am |  (13)

by [Barry Schwartz](#)  | Filed Under [Google Search Engine Optimization](#)

Google's John Mueller said that your site can rank fine with or without H1 tags. You don't have to use any H1 tags, or you can use many, either way, it is not a critical issue specifically for Google search.

He did say it helps Google understand the structure of the page, just like it helps users understand the structure of the page.

He said this in a video this Friday at the [23.47 mark](#) when he was asked if "it is mandatory to just have one h1 tag on a web page or can it be used multiple times?"

He responded:

WRAP
YOUR POST
TITLE IN
AN H1 TAG

```

What are the merits of description meta tags?

Description meta tags are important because Google might use them as snippets for your pages. Note that we say "might" because Google may choose to use a relevant section of your page's visible text if it does a good job of matching up with a user's query.

Adding description meta tags to each of your pages is always a good practice. If Google cannot find a good selection of text to use in the snippet, the Webmaster Central Blog has informative posts on [improving snippets with better description meta tags](#)¹⁸ and [better snippets for your users](#)¹⁹. We also have a handy Help Center article on [how to create good titles and snippets](#)²⁰.

17 Ways to Improve SEO Rankings in 2019

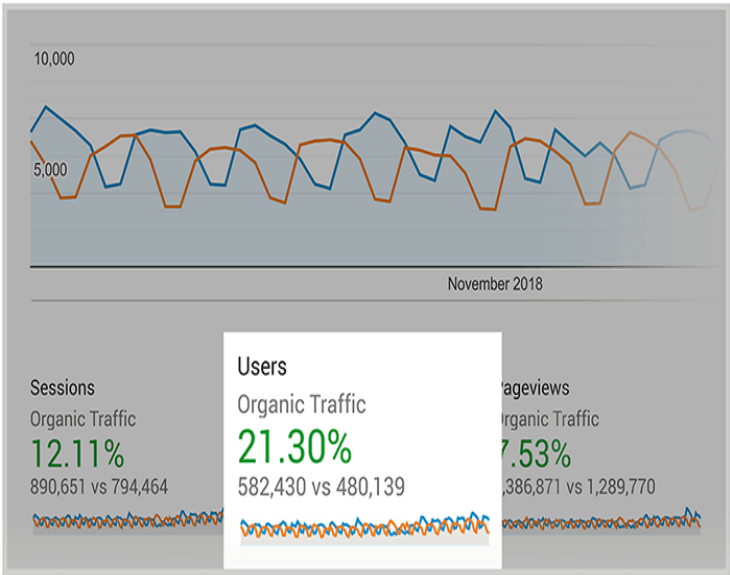

by Brian Dean Last updated Jul. 30, 2019

1160 shares

Today you're going to learn EXACTLY how to improve your site's ranking.

In fact, these 17 techniques helped grow my site's organic traffic by 21.30% in 3 months:

The best part?

Everything here is working GREAT right now.

hosting, don't expect fast loading times. A few years back I switched from a budget host to \$200/month premium hosting. And the speed difference was INSANE.

Step #5: Find and Fix Indexing Problems

Next, it's time to find web pages that Google isn't indexing.

To do that, fire up the good ol' [Google Search Console](#).

CHUNK YOUR CONTENT

- Use many H2 and H3 tags

CHUNK CONTENT

With that, here are the most common types of Zombie Pages:

- Archive pages
- Category and tag pages (WordPress)
- Search result pages
- Old press releases
- Boilerplate content
- Thin content (<50 words)

HAVE AN ACTIVE COMMUNITY

Marko Saric

Nice study! For those on self-hosted WordPress, I recommend these two plugins in order to really boost your site speed:

Autoptimize plugin aggregates all the files so you have fewer requests and it minifies them.

Lazy Load By WP Rocket plugin helps you only load images and videos that are in the browser's view (i.e. above the fold) without adding any JavaScript.

Pawel Hyzopski

thanks for the data, but the data is just that, irrelevant, as you measured random sites, and random site dont do squat.

```

TYPES OF BACKLINKS

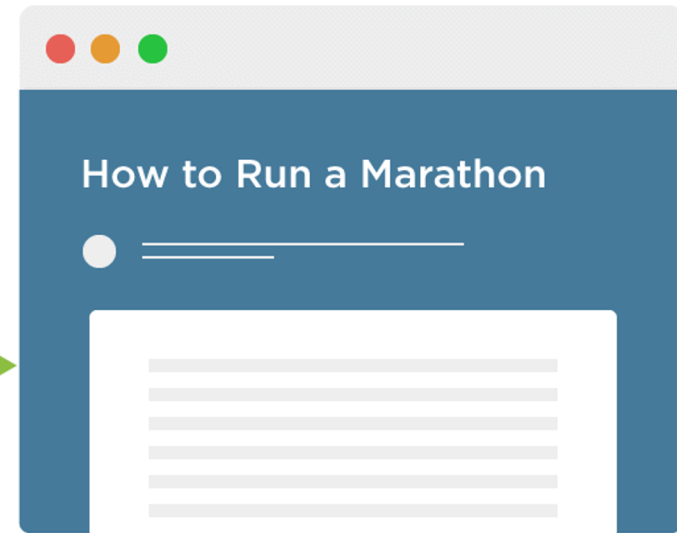

No Follow vs Do Follow

Other Website

Contains a link to your website and is in the same industry as your website

Strong Backlink

Your Website

Has a strong contextual **backlink** from the other website

BACKLINKS BUILDING STRATEGIES

- Share valuable contents
- Don't spam links
- Don't pay for links
- Share your links to content-related websites
- Pushing social brand identity
- Build your own network
- Content is KING.

COMMUNITY - PROMOTE YOUR GOOD CONTENT

Work doesn't stop when you hit "Publish." Make sure to include promotional and cross-promotional efforts in your Content Strategy

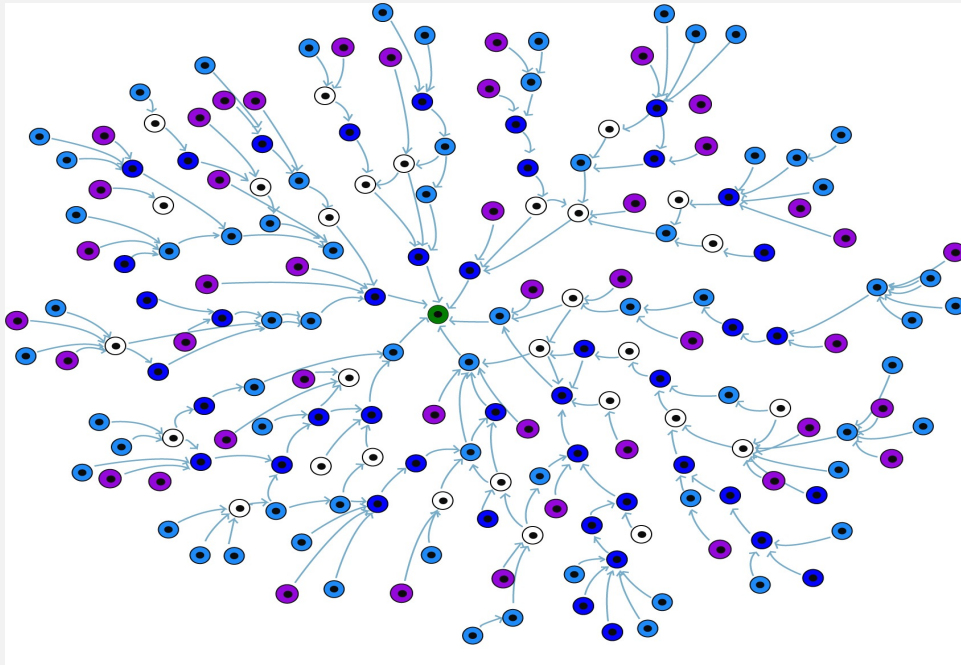

Use following channels to amplify your content:

- Link Building
- Social Media
- Public Relations
- Offline Media (TV, Radio, etc.)
- Paid Advertising
- Events posters or leave-behinds (QR code)
- Printed collateral (QR code)

COMMUNITY - WHAT IS LINK BUILDING?

Link building is an ongoing iterative process where you build shareable, informative content and promote relevant content to the list of high-quality source domains through backlinks and social channels.

Why is this important?

Link building is an important area of SEO, as it influences a site's domain authority. Higher domain authority correlates to higher ranking. Higher volumes of high quality backlinks leads to higher domain authority.

Recommendation

Focus on a **natural, well-diversified, relevancy-based** link building strategy to strengthen your profile.

Tactics should primarily be focused around acquiring links from high-quality domains - for example, a domain with a homepage that has a PageRank of 3+, or a domain with a Majestic Trust Flow of 20+.

COMMUNITY - GOOD BACKLINKS VS. BAD BACKLINKS

Your link is good if it is:

- 1. EDITORIALY PLACED:** It is earned or volunteered freely from the linking source's author/editor
- 2. CONTEXTUAL:** It is contextually relevant to the page in which it is found, and naturally included therein
- 3. NATURAL:** It uses relevant, descriptive, and (where appropriate) branded anchor text to describe the content of the link's target

Your link may be bad if the source:

- 1. IS A LOW QUALITY DOMAIN:** TrustFlow < 20, PageRank < 3
- 2. HOSTS LOW QUALITY CONTENT:** Page or domain with frequent misspellings and bad grammar, duplicate, thin or machine-generated content
- 3. IS PART OF A LOW QUALITY NETWORK:** Low-quality (content or equity) IP or subdomain group

TAKEAWAYS

- Focus on a manageable number of pages
- Ensure you're building the right type of content for the SERP
- Link your content to relevant pages with keyword rich anchor text
- Promote pages on social media and with other teams

CÂU HỎI THẢO LUẬN

1. Tại sao Google lại coi backlink là yếu tố xếp hạng quan trọng?
2. Giữa từ khóa ngắn (head keywords) và từ khóa dài (long-tail keywords), loại nào nên ưu tiên cho website mới?
